

JOB DESCRIPTION - REMINOVA LTD

Title: CARIOLOGIST / CARIES SPECIALIST

Reporting to: CEO

Based: Edinburgh, with some work at home/ elsewhere possible

FTE: Full-time but an initial part-time role or job-sharing may be possible for the right candidate(s)

The Role: Reminova is searching for an outstanding and ambitious individual with a passion for preventative dentistry who can help continue our mission of transforming the clinical management of dental caries. As the Company's first Clinical Cariologist, you will use your expert knowledge of dental caries; covering the basic science, clinical studies, general practice and public health perspectives, in all areas of the Company's technical and business development.

It's a unique role, for a unique person. You will play a major part in preparing the landscape and different audiences for our first clinical treatment product that painlessly reverses and remineralises (repairs) early and middle stage caries (ICDAS stages 1-4), providing dentists with an alternative to drill-n-fill, and a new paradigm in preventive caries management.

You will become a vital cog in our Company, intimately involved in helping shape technical direction and product developments with your clinical perspective. You will build compelling clinical evidence, and evangelise the opportunity to industry, regulators, clinicians and patients. You will educate colleagues and partners with your specialist knowledge, helping weave cariology into our Company DNA. You will be able to demonstrate your passion for our mission and your in depth understanding of dental caries, as well as your communication skills through your role in outstanding studies, peer reviewed papers and presentations.

You will work with an experienced management team that includes other dental professionals, entrepreneurs and seasoned start-up management. We are building a major player in global dentistry and there will be international travel and periods at locations around the world as you take your career in a new direction.

Key Responsibilities: *the mix will vary with the Company's development over time*

- Forging and maintaining relationships with: General Practitioners, Key Opinion Leaders and Academics, nationally and internationally to support the Company's business developments and corporate objectives
- Managing clinical aspects of relationships with supply chain partners and customers in both the clinical practice and OTC spaces
- Designs pre-clinical work and analyses data for preparation of clinical studies
- Constructs clinical studies and overseas-manages them with our regulatory lead
- Evangelise the Company's clinical, technology and business opportunity to appropriate audiences (above) through publications, presentations and input to Company literature
- Input clinical viewpoint to product development/ technical developments
- Educates Reminova's workforce, and partner organisations, on cariology and clinical advantages of EAER

Other Responsibilities:

- Involvement in continuing education, commercial and corporate activities

- Contribute to Company strategy and direction
- Ensuring clinical outcome is woven into the fabric of the Company's strategy

Knowledge, Skills and Experience:

The successful candidate will be able to demonstrate a mix of the following knowledge, skills and experiences;

- Recognised Dental Degree, appropriate further professional education/ qualifications and relevant peer reviewed clinical studies and publications
- A passion for translating research evidence into products or clinical practice to improve health outcomes
- Strong cariology knowledge and experience ranging from basic science to clinical research, product development and clinical practice
- Ability to work across the different Dental Specialities involved with clinical caries management
- Previous exposure/ collaboration or work experience in the dental industry FMCG or similar environment
- Experience of working within regulated environments and International quality systems
- Proven track record of leading successful clinical studies and outcomes
- Good leadership, interpersonal and communication skills
- A sharp mind that can help blend clinical and business matters
